Bill4Time: Now Saving You Even More Time!

Your time is valuable. And here at Bill4Time, we know a thing or two about the importance of [time management](). We've got an update that is going to save you a significant amount of time. Time and time again.

Before you're ready to send your invoices out, you typically review the pre-bill. When you click the "Create PDF" button for your pre-bill, Bill4Time gathers all of your activities, clients, and projects, and assembles them neatly in one document for you. Depending on the size of the batch of invoices, this process could potentially take a while.

But not anymore. In our latest patch, we redesigned the process behind creating PDFs, and the result is nothing short of stunning. Creating PDF files for a batch of [invoices]() now takes only a small fraction of the time it once required. We would even go so far as to say you can create PDFs *alarmingly fast*. Have to see it to believe it? Go ahead, experience the difference yourself.

It's time. Time to have your invoicing changed forever.
